# Preface

The Hydrological Information and Water Forecasting Branch, Hydrology Division, Bureau of Water Management and Hydrology, Royal Irrigation Department, has prepared the Long List of Rainfall Stations to provide a comprehensive compilation of rainfall stations throughout Thailand. The document classifies stations by and provides detailed information for each station, including station code, station name, sub-district, district, geographic coordinates, and the periods of rainfall observation.

This publication serves as a valuable reference for rainfall monitoring, rainfall analysis, climatological studies, and rainfall data management, as well as supporting planning, operational activities, and research related to rainfall and hydrometeorological information.

The preparation of this publication has greatly benefited from the valuable advice and guidance of hydrology experts and the Director of the Hydrology Division. The editors also gratefully acknowledge the technical support and rainfall data provided by the Regional Irrigation Hydrology Centers 1–8. Their contributions have been invaluable to the successful completion of this publication.
