Preface

The Hydrological Information and Forecasting Branch, Hydrology Division, Bureau of Water Management and Hydrology, Royal Irrigation Department, has prepared the Long List of Hydrological Station as of 2026 to compile information on the hydrological stations of the Royal Irrigation Department. The document classifies stations by major river basins and provides detailed information for each station, including station code, river and stream name, location, geographic coordinates, catchment area, and the periods of observation for water level, discharge, and sediment data.

This publication serves as a valuable reference for hydrological monitoring, hydrological analysis, hydrological model development, water resources management, as well as planning, engineering, and research activities related to water resources.

The preparation of this publication has greatly benefited from the valuable advice and guidance of hydrology experts and the Director of the Hydrology Division. The editors also gratefully acknowledge the hydrological data and support provided by the Regional Irrigation Hydrology Centers 1 – 8. Their contributions have been invaluable to the successful completion of this publication.
